

Please rate Wednesday's General Session, "The Flipped Classroom: Turning Your Security Education Program Upside Down", Thomas Mauriello, ForensIQ, Inc., presenter. (1 - poor, not much value; 5 - excellent, value added).

1%:1
2%:2
12%:3
31%:4
54%:5

Comments:

- Tom continues to outdo himself. This type of out of the box forward thinking should motivate us all to improve our communication skills and methods.
- Excellent presentation!
- Tom is so creative! Now I want a video studio to create our security training! He gave us ideas on how to freshen our materials. This was excellent too.
- Tomm always has new and innovative ways to look at things. Interesting new perspective on training for the younger population.
- This was the best of all the presentations. My manager and I are going to apply his "chunking" idea to one of our training programs.
- The concept behind the "flipped classroom" was clear but the presentation itself was a little hard to follow.
- I like the concept but I'm not techno savvy so will need to get my IT personnel to assist.
- I loved his presentation. He kept me interested throughout the entire session.
- Awesome. Gave me many ideas.
- Very clever -- excellent presentation.
- Tomm is fantastic and I love his concept of the flipped classroom. I think this is something that we can certainly use and benefit from in my chapter. He is another great speaker.
- Always enjoy and learn very much from Mr. Mauriello's presentations.
- Great new ideas
- Another great speaker and Security Professional. He and Ray Semko are by far the best in our business.
- Nicely done.
- Always fantastic--he has such insight and wonderfully creative presentation skills
- Great presentation.
- He is right. We are constantly looking for ways to improve our training. Training time is very crucial and every minute counts. When dealing with the Firm Fix Price contract and LP TA contracts it is hard to work in the training time so any way to make it effective as well as efficient. Thanks
- EXCELLENT Presentation!!!
- Definite take-away from this session.
- Regardless of the topic, I enjoy Tom's presentations...and this was a pertinent topic.
- Quite an opener and raised interesting questions on how do we teach and learn, now and in the future.
- Enjoyed and found the session content thought-provoking.
- Would love to have this available to listen and see again ... he has a great idea and it would be good to review again to see how to apply in our local company environments.
- Awesome training venue option that can be used
- Great presentation!
- Interesting and exciting briefer, Tom is always a good briefer
- I liked looking at video options for briefing. Tom's style is engaging. It might have been better to show a few "shorts" as examples.
- Great ideas!!!
- Very well planned and organized.
- Excellent briefer/entertainer. Made good points about how to present information.
- Tomm is always innovative, creative, and this presentation was all that and more. Great concept with widespread application.

- Great presentation. New information. Dynamic speaker!!
- This was an excellent demonstration of how to create an interactive security program. He was an excellent presenter.
- Good presenter and information, but not relevant to my facility. I also worry about the promotion of technology without any information regarding how safe it is to use nor the acknowledgment that many companies have their internet locked down so the use of free technology sites like Skype or GoogleChat are not accessible.
- Very engaging and informative.
- It started off as interesting, but sort of fizzled out. He presented some food for thought as far as reaching the new generation of employees, but I was looking for more ideas than he presented.
- Helpful, informative, entertaining
- Loved the concept and it was refreshing to get a different perspective on training.
- Interesting presentation. Inspired my coworkers & I to update some of our company presentations.
- He makes you think.
- This was a great presentation; I walked away with many ideas for my own education program.
- Left me with much to think about and a desire to incorporate that style of training within our company.
- Informative and provided some good information that can be taken back to our individual facilities to improve our security education programs.
- I love Tom! He added humor, but got his message across.
- Loved this one! Pretty cool ideas to assist with education.
- He presented good ideas on ways to use technology to enhance learning while cutting down on travel and fixed schedules.
- It was odd to at the beginning, then it got really good! I love Tom Mauriello!
- Excellent presenter and presentation, I really enjoyed Tom's style and enthusiasm as well as his ability to bring the audience into it.
- I liked how Tom M used the eLearning classroom as a part of his session presentation.
- WOW!
- Good job.
- Now for a practicum!
- I'm very excited about Tom's new idea for education. I'd like to see more information on this next year, and possible use it for next year's annual seminar so more people can get educated.
- Very nice and we didn't get screamed at. Very good concept.
- Very engaging and thought provoking!
- EXCELLENT...this guy needs more than 30 minutes...He must be brought back!
- Tom is wonderful speaker and you learn so much to take back with you from him.
- If anyone other than Tom Mauriello presented this the session would have been bored to tears.
- Excellent! Though there was not much about security education and training, but did discuss new ways of learning in today's age.
- Loved this idea! Looking forward to implementing it.
- Liked his presentation. He's able to keep the audience engaged and gives you good information for thought on how to train the new generation coming into play.
- Great guy, great speaker, but webcams and recording your lessons came out 15 years ago. I was surprised he picked that as a topic for a security conference.
- Interesting concept
- Wow!
- One of the best of the conference!
- Best of the presentations so far.
- This presentation was fantastic! Very timely and informative. Tom had a strong message about adapting teaching strategies to keep up with the times and technology, and not pushing personal values on others. He delivered his message clearly in an engaging way and gave great examples so his methods can be easily implemented by anyone.
- Great presentation!!
- Really enjoyed his method of presenting, very engaging.
- Awesome ideas and opened my eyes to different training options

- Mr. Mauriello is an outstanding professor. His method of teaching is very effective.
- Highlighted ways security professionals can blend the techniques of the past and present with the technologies and excitement of the future.
- He is always so informative
- Always useful info; fantastic speaker!
- Awesome and thought provoking
- Great presentation. Just as DSS CDSE has changed from instructor led in the class room to web based training, virtual presentations and webinars, Mr. Mauriello points out that everyone must change with the times and technologies.
- Tom is an excellent presenter. This was a great brief especially for the last day.
- Tom's presentation was very informative and offered a new way to view the 'classroom'. Great session!
- Great ideas from the master of security training.
- Today's generation will not listen for 90 minutes; wants only 15 minutes of content.
- Possibly entertaining but not much value.
- Excellent! We need to think outside the box! Great way to expand the NCMS reach and influence. Excellent means of providing training to a growing membership.
- Excellent presentation and great information.
- Interesting and inspirational for what a small company with a distributed work force can do to reach out and train their employees differently. We will NEVER get everyone into the office for a massive group briefing, it just won't happen, so this sort of distributed learning platform has legs.
- Having seen Tom speak twice before, I always look forward to his presentations and was excited to see that he would be presenting at this level. I really hope that everyone enjoyed his presentation and his perspectives.
- Information was interesting, but we are already working in a virtual society.
- Great low cost ideas
- Good!
- He opened my eyes to do new things ! Excellent.
- Inspired and inspiring. We are already remodeling our in-house training.
- Always inspiring to see Mr. Mauriello speak.
